Held on U.S. 40:	40.0 - 60.0%
Held on U.S. 50:	5.0% Maximum
Through U.S. 50:	0.5% Maximum

Packaging & Storage:

The material is packaged in food grade bags or totes. This product is best used within one year of the date of packing when kept cool in a clean facility at low humidity.

Allergens:

Our facility is dedicated to the storage, handling and processing of corn and dry milled corn products. This product does not contain major food allergens other than trace amounts of soy that may be present as a result of cross-contact from customary methods of harvesting crops as well as from the use of shared storage and transportation equipment. This product is certified gluten free by GFCO.

Micro:

Snackmeal, a type of cornmeal, is made from corn, a raw agricultural commodity. While the corn is cleaned, milled and handled in a sanitary environment, the process does not have a kill step. Cornmeal is “ready to cook” and not “ready to eat”.

GMO:

This product has been verified by The Non-GMO Project as “**NON-GMO SNACKMEAL**”. The corn used to make this snackmeal meets Non-GMO Project standards for sampling, PCR testing and identity preservation.
