18x24 3 Mil Natural 250/case, FDA Polyethylene Bags

Flat bottom seal
18-inch bag opening
24-inch length
3 mil thick, or .0003 inches thick
FDA Clear
250/Case bags per case
Performance = medium duty

I am writing this letter to inform you that the polyethylene products we manufacture for your company, when specified "FDA approved", conform to F.D.A. standards.

The raw materials supplied to us and extruded by us are prime virgin polyethylene resins and carry USDA/FDA approval. The prime High Density Polyethylene resins used in 2016 are HDPE Total Chemical #2285 and/or Equistar #5005, and prime virgin Linear Density Polyethylene Westlake #LF-1020DD and/or Equistar #GA501-022, all of which comply with Food Additive Regulation 21 CFR 177.1520 for Olefin Polymers par (c) 3.1a, and product may be used to hold food, except during cooking.

We can supply all the SDS sheets for all resin used. All products are made with 100% of the polyethylene and additives listed above, and all products are packaged in poly bags, then boxed for added protection.

I trust this meets the requirements you requested. The information is believed to be accurate as of the date of this letter. However, since regulations are subject to change, we recommend that you contact us annually to confirm regulatory status. It

In addition, Republic Bag marks each box with a production code – via stencil. This code indicates the actual date of production, and employee code. Emergency contact would be 800-852-2247 ext "0", and ask for customer service.

Please feel free to contact me with any additional questions or comments.

Regards,

STEVE SCHROEDER
